The high quality of the microfiber mops allows them to absorb 500% of their own weight. The mops can be washed more than 500 times with proper washing, thus reducing the cost of buying new mops. Wash at a maximum of 95°C. Use 1/3 of the recommended amount of detergent. Do not use fabric softener. Tumble dry in a damp-controlled tumble dryer or set to cabinet dry at 40°C for a maximum of 30 minutes or a maximum of 60°C for a maximum of 15 minutes. Resistant to chlorine and alcohol. Shrinkage no more than 2%. Floors with rough surfaces reduce the life of the mop.

Tips on preparation: 1 dl water = 10 m²

GRS stands for Global Recycled Standard and is an international voluntary certification scheme for recycled materials.

The standard has been created to increase the use of recycled materials in a credible way – while ensuring that the people who produce the products have proper working conditions and that the products are produced with respect for the environment.
